

SEMINARIO INTERNACIONAL “Cuba 2017” ADAPTACIÓN, GESTIÓN DE RIESGOS Y DESASTRES DE LAS CARRETERAS. LAS ORGANIZACIONES DE LAS CARRETERAS ANTE EL CAMBIO CLIMÁTICO.

VENUE: Melia Cohiba Hotel
TOPICS: Engineering
STAR: Nov. 08, 2017
END: Nov. 10, 2017

INVITATION

La Asociación Mundial de la Carretera a fin de cumplir su misión como líder mundial en el análisis y discusión de los aspectos relevantes sobre carreteras y transporte por carreteras, así como para identificar, desarrollar y diseminar las mejores prácticas internacionales relacionadas con éstas, ha desarrollado e implementado el Plan Estratégico cuatrienal 2016-2019, en el cual se enmarca el Seminario Internacional Adaptación/Resiliencia al Cambio Climático, Gestión de Riesgos y Catástrofes en Carreteras, en cuya agenda se debatirán, evaluarán y analizarán resultados y aspectos vinculados a los temas estratégicos: Gestión y Finanzas; y Cambio Climático, Medioambiente y Catástrofes, ya que sus efectos sobre la infraestructura cobran cada vez mayor importancia entre la comunidad del transporte, lo que conduce a preguntas sobre cómo mitigar los efectos negativos y cómo adaptar de mejor manera las carreteras a climas extremos o sumamente variables. Las respuestas a estas preguntas comprenden una diversidad de disciplinas, incluyendo planeación y diseño, materiales, respuesta a emergencias, inversiones, entre otros.

Este seminario es organizado por los Comités Técnicos A.3 "Gestión de Riesgos", E.1 "Estrategias de Adaptación/Resiliencia", E.3 "Gestión de Catástrofes", y el Ministerio de la Construcción de Cuba, incorporándose a su desarrollo el Ministerio del Transporte, el Consejo Nacional de la Defensa Civil, el Ministerio de Ciencia, Tecnología y Medio Ambiente, la Universidad Tecnológica de La Habana, la Universidad Martha Abreu y la Universidad Julio Antonio Mella, así como la Unión Nacional de Arquitectos e Ingenieros de la Construcción de Cuba.

PROGRAM

de las normas de diseño CUOTAS DE INSCRIPCIÓN

Participantes: 300.00 cuc

Derecho a: participar en todas las sesiones del Seminario, a los materiales de acreditación, CD con las ponencias, asistir a las actividades de apertura y clausura, y el certificado de participación.

CONTACTO A: Ing. Josefina Alvarez fina@micons.cu

TEMÁTICAS:

Aplicación de criterios de fiabilidad (análisis de riesgos) en los proyectos viales.

Modelado informático para la evaluación de la vulnerabilidad en carreteras.

Influencia de los criterios de riesgo en la evaluación costo-beneficio de las obras.

Políticas y estrategias de las administraciones de transporte, evaluación de su rendimiento y gestión financiera.

Estudios de factores de riesgo ante catástrofes en las infraestructuras.
